TITLE : ANTISEPTIC AND ANTIFUNGAL AGENT

I

II

ABSTRACT : PURPOSE: An antiseptic and antifungal agent, containing 2-(4-thiazolyl)-1H-benzimidazole and N^α -long chain acyl basic amino acid derivative as active constituents, having low toxicity, and capable of exhibiting improved effect on various molds growing in household environment.

CONSTITUTION: An antiseptic and antifungal agent containing (A) 2-(4-thiazolyl)-1H-benzimidazole and (B) one or more of an N^α -long chain acyl basic amino acid derivative of formula I (R is 5-19C alkyl or alkenyl; X is NH_2 , OCH_3 , OC_2H_5 , OC_3H_7 , OC_4H_9 or $\text{OCH}_2\text{C}_6\text{H}_5$) or formula II (n is 3 or 4) or an acid addition salt thereof as active constituents. The mixture molar ratio of the above-mentioned components is not particularly limited but is 1:1, and the molar ratio (A/B) is preferably within (150/1)-(1/50) range. In use, the components are dissolved in a suitable solvent, and used by coating, spraying or dipping method, etc. The total amount of both components (A) and (B) to be incorporated is preferably 0.1wt% or more.
